## SUMMARY

Data Analyst skilled in Python, SQL, Power BI, and Excel, dedicated to transforming raw data into meaningful insights and intuitive dashboards. Focused on data-driven problem-solving, clear storytelling, and contributing to a vision where analytics guides smarter business decisions.

## TECHNICAL SKILLS

**Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn)

**Databases:** MySQL, SQL Queries, Joins, CTEs, Window Functions

**Analytics Tools:** Power BI (DAX, Data Modelling, ETL, Dashboards)

**Excel:** Pivot Tables, Lookups, Conditional Formatting, Data Cleaning

**Other:** Statistics, Data Visualization, Reporting, Problem Solving

## WORK EXPERIENCE

### Spordia Softech, Pune | 6 Months

- Performed data cleaning, preprocessing, and EDA using Python and SQL.
- Developed Power BI dashboards to monitor business KPIs, trends, and performance metrics.
- Automated weekly and monthly reporting processes improving report delivery time by 40%.
- Collaborated with internal teams to identify data gaps and provide actionable insights.

## PROJECTS

### Uber Car Data Analysis Dashboard | [Live link](#)

- Analysed booking trends, peak demand hours, customer behaviour, and ride frequency patterns.
- Cleaned and transformed data using Python (Pandas) for visualization readiness.
- Built an interactive Power BI dashboard with KPIs, slicers, and filters to help understand operational efficiency.

### Stock Market Analytics Dashboard | [Live link](#)

- Conducted time-series analysis of stock market data using Python to identify trends and volatility patterns.
- Utilized DAX in Power BI to calculate moving averages, RSI, and trend indicators.
- Designed a multi-page dashboard comparing bullish and bearish market movements.

## EDUCATION & CERTIFICATIONS

Master of Computer Applications (MCA) – VP Institute Sangli | bachelor's degree – KWC Sangli

- Data Analytics using Python – Udemy | Power BI Dashboard Design – Udemy
